## Skills

---

**Languages:** Java, Python, JavaScript

## Education

---

**Secondary School**

**2015-2021**

**School Name :-** GOREGAON ENGLISH SCHOOL

**Diploma in Computer Engineering**

**2021-2024**

**College Name :-** KALA VIDYA MANDIR INSTITUTE OF TECHNOLOGY

**Relevant Coursework:** Object Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Networks, Android Developer Course - Android Fundamentals

## Project Work

---

### 1. InvestIQ

It is a web application using Dash (a python framework) and some machine learning models which will show stock plots based on the stock code given by the user. Also the ML model will enable the user to get predicted stock prices for the date input by the user.

### 2. Attendance Management System

Attendance management is the act of managing the presence and absence of students in a school or institution. There is a compelling need for a well-designed attendance management system so that the records of their participation are efficiently managed, especially in the case of lectures with large numbers of participants. Therefore, many systems to optimize the students' attendance management have been proposed so far.

### 3. Typing Speed in Python

This project just contains the user section. The user can improve their Typing speed playing this game. You have to type as many words as you can in the given amount of seconds to score.

## Certificates

---

- Advanced Python for Data analysis
- Android Developer Course - Android Fundamental
- Data Structures and Algorithms
- Web Development using HTML and CSS

## Internship

---

- Data Science, AI with Machine Learning using Python
